Environmental Policy

Introduction

Neschvill '97 Kft. T/A AF Industries is committed to conducting its business in an environmentally responsible manner. As a distributor of high-performance polymer repair composites and protective coatings to CEE markets, including Oil & Gas, Petrochemical, Wastewater, and Renewables, we recognize the importance of minimizing our environmental impact and contributing to the sustainability of our planet.

Our Commitment

We are dedicated to the following environmental principles:

1. Waste Reduction

We actively seek to reduce waste across our operations. This includes minimizing packaging materials, optimizing resource use, and encouraging recycling wherever possible. We aim to reduce our environmental footprint through continuous improvement in our processes.

2. Sustainable Sourcing

We are committed to sourcing our packaging materials sustainably. We prioritize working with suppliers who demonstrate best environmental practices and share our commitment to sustainability.

3. Compliance with Standards

We adhere to rigorous quality management standards, ensuring that our operations not only meet customer expectations but also comply with relevant environmental regulations.

4. Continuous Improvement

We strive to continuously improve our environmental performance. We regularly review and assess our environmental impact, seeking innovative solutions to reduce our carbon footprint and overall environmental impact.

Our Goals

To continuously explore and implement new ways to reduce waste and enhance our sustainability efforts.

- To foster partnerships with suppliers who are committed to environmental stewardship.
- To ensure that our employees are aware of and engaged in our environmental initiatives.

Conclusion

At Neschvill '97 Kft. T/A AF Industries, we understand that protecting the environment is a collective responsibility. We are committed to making a positive impact on the environment. We pledge to uphold the principles outlined in this policy and to be transparent in our efforts to improve our environmental performance.
